

ARCH : MOTT

[Quoting from a letter from Mott's daughter-in-law, the donor of these papers, he 'entered the service of the Lanchester Motor Company in its early years & subsequently became chief tester. He left the firm in 1919 to take a similar post with D Napier & Sons, and when the Acton firm ceased car manufacture in 1924 he joined the Gwynne Car Co. of Chiswick He then became Service Manager to Morris Commercial Cars & later Chief Engineer to this firm until the time of his death'. The papers include 'a complete record of the journey he made to East Africa to demonstrate the Morris Roadless Lorry fitted with caterpillar gear manufactured by the Roadless Traction Company, to be demonstrated from Mombasa via Tanga to Nairobi. He left Dover early January 1925 & was away for over 12 months'.
